Natan Yagodaev
Website Developer

Profile

Frontend developer with hands-on experience developing and managing digital products.
Experienced with JavaScript frameworks like React.js and Vue.js for creating complex user interfaces.
Also work with Node.js for server-side applications and Express for building RESTful APIs.

I leverage AI tools to enhance productivity and code quality throughout the development process.
I enjoy tackling both frontend challenges and backend development to create complete web solutions.

Experience

Deloitte, Tel Aviv, Israel
Website Developer   *2023 - Present*

- Developed and maintained websites and applications using both traditional coding methods and no-code platforms to meet diverse business requirements
